

Jake Castillo

DevSecOps Software Engineer

Honolulu, HI · (808) 216-2163 · jakecast@hawaii.edu · github.com/jakecastillo · linkedin.com/in/jake-castillo

I'm a DevSecOps software engineer who secures cloud-native AWS platforms — embedding security into the development lifecycle, modernizing legacy systems, and shipping resilient, type-safe services. AWS Solutions Architect & Cloud Practitioner certified.

EXPERIENCE

DevSecOps Software Engineer, [Pacific ImpactZone](#)

Oct 2025 – Present

- Lead DevSecOps initiatives, embedding security controls and automated checks directly into the CI/CD pipeline.
- Shift security left across the SDLC — threat modeling, dependency and secret scanning, and hardened, scalable cloud delivery.

Software Engineer, [DataHouse](#)

Jan 2021 – Oct 2025

- Re-architected a brittle legacy monolith into NestJS microservices — isolating failure domains to reduce production incidents and unplanned downtime.
- Built full-stack features end-to-end with React, NestJS/Prisma, and PostgreSQL, enforcing schema-level type safety to eliminate a class of runtime data bugs.
- Served as subject-matter expert and technical lead, partnering with cross-functional teams and owning production support.

Software Engineer (Part Time), [DataHouse](#)

Aug 2020 – Jan 2021

- Deployed thermal-scanning systems across Hawaii airports for COVID-19 mitigation, owning installation and field support.
- Ran regression testing for the LumiSight web and mobile apps and contributed to QA strategy.

Engineering Intern, [DataHouse](#)

Jan 2020 – Aug 2020

- Designed and built a workflow solution for the Hawaii Animal Quarantine Holding Facility.
- Led front-end development and planned and installed critical system hardware.

EDUCATION

B.S. Computer Engineering, University of Hawaii at Manoa

Dec 2020

CERTIFICATIONS

AWS Certified Solutions Architect – Associate

2023

AWS Certified Cloud Practitioner

2023

SKILLS

Languages: TypeScript, JavaScript, C, C++, SQL

Frameworks: React, Next.js, NestJS, Node.js, Express, Vue, Angular, Prisma

Cloud & Practices: AWS, CI/CD, DevSecOps, Secure SDLC, Agile

Databases: PostgreSQL, MySQL
