

Jake Castillo

DevSecOps Engineer · Security-Minded Full-Stack + Cloud (AWS)

Honolulu, HI · jakecast@hawaii.edu · (808) 216-2163 · [linkedin.com/in/jake-castillo-00567819b](https://www.linkedin.com/in/jake-castillo-00567819b)

DevSecOps engineer building secure, resilient systems on AWS. Computer engineer with a strong foundation in software and hardware design across multiple platforms, and a drive to give back to the community. Experienced in full-stack development (leaning back-end), testing, and debugging with a focus on cloud architecture and integrating security into the development lifecycle.

// Audit_Log

DevSecOps Software Engineer Pacific ImpactZone

Oct 2025–Present

- Leading DevSecOps initiatives and implementing secure software development practices.
- Focusing on integrating security into the development lifecycle and ensuring robust, scalable solutions.

-100% of pipelines security-gated shift-left security in the SDLC

Software Engineer DataHouse

Jan 2021–Oct 2025

- Led system integration and modernization initiatives, including migration of legacy systems to contemporary architectures, streamlining DevOps practices, and enhancing maintenance processes to boost system performance and reliability.
- Designed and implemented scalable software solutions across multiple projects using technologies such as ReactJS, Prisma/NestJS, and PostgreSQL.
- Transitioned into support roles resolving user issues through bug fixes, system enhancements, and ongoing maintenance.
- Collaborated with cross-functional teams and stakeholders to deliver high-impact solutions and provided technical leadership as a subject matter expert (SME).

-40% faster deploys -5 projects shipped legacy-modern architecture migration

Software Engineer (Part Time) DataHouse

Aug 2020–Jan 2021

- Delivered technical support and system maintenance, including installation of thermal scanning systems across Hawaii airports to support COVID-19 mitigation efforts.
- Performed regression testing for LumiSight mobile and web applications and contributed to QA strategies and operational mapping.

statewide airport deployments -2 apps QA-tested

Intern DataHouse

Jan 2020–Aug 2020

- Partnered with mentors and peers to design and implement an efficient workflow solution for the Hawaii Animal Quarantine Holding Facility.
- Led front-end development efforts and the planning/installation of critical system hardware components.

1 workflow system delivered end-to-end front-end + hardware
