
Jake Castillo

Software Engineer

PH: 808-216-2163

Email: jakecast@hawaii.edu

Profile

Computer software/hardware design and innovation specialist with a drive to give back to the community and a strong foundation in engineering principles across multiple platforms and technologies. Experienced in development, testing, and debugging code with a focus on cloud development/architecture (AWS).

Professional Experience

DataHouse Consulting, Inc., *Software Engineer, January 2021 – Present*

CAL-ACCESS Replacement System - California Secretary of State – *Software Developer*

Assisted in the modernization efforts to implement a new data driven system for the CAL-ACCESS application which is the public's window into California's campaign disclosure and lobbying financial activity, providing financial information supplied by state candidates, donors, lobbyists, lobbyist employers, and others. Contributed to the development effort as a fullstack developer in an agile, big team environment.

DHSP: Carespan US – *Tech lead, Fullstack Developer*

Processed 3rd party integration requirements for a legacy modernization effort of the Carespan healthcare system. Alongside solution architects, defined the solution requirement specification, proposed solution designs, owned technical requirements, and documented approach for 3rd party integration into an Electronic Medical Record system to be forked into a custom environment for our client. Contributed to the fullstack development effort, reviewed code and ensured alignment with coding standards.

Astiva (demo) – *Tech lead, Backend Developer*

Led efforts to deliver a mobile application in an aggressive 1 month sprint timeframe. Solution consisted of an application for users to apply for health insurance and administrators to approve insurance and manage users. Contributed to backend development effort and guided onshore developers to a successful delivery. Reviewed code and ensured that it aligned to

coding standards and managed releases of the web application and API that served both the mobile and web application.

Research Corporation of the University of Hawaii (RCUH) FIS Modernization: Phase 2 – SAP Integration: *Technical Architect*

Collaborated closely with SAP independent contractors to design technical integration solutions. Working within technical, business, and regulatory constraints, developed and restructured RCUH FIS to migrate from an AS400 financial system to an SAP COTS system.

Hawaii Department of Education (HIDOE) CPT/SFA/HISOQ – *Developer, Support Engineer*

Worked as a backend developer focused on the CIP (Capital Improvement Project) Project Tracker, School Facilities Authority, and Hawaii Statements of Qualifications Portal applications for Hawaii's Department of Education. Following the ending of the development contract, transitioned to a support engineer working on bugfixes and enhancements to fulfill support tickets.

RCUH FIS Legacy M&O – *DevOps, Developer, Tech Lead, SME*

Following the completion of the RCUH Modernization project, Jake led the DevOps processes to maintain the RCUH Legacy system and took on the role of an onshore technical lead and SME. Jake took this opportunity to analyze performance data and clean up operational routines in order to streamline and improve the M&O process.

RCUH FIS Modernization: Phase 1 – *Backend Developer*

Jake worked as a backend developer on the RCUH Modernization project, contributing to the migration of the legacy AngularJS, NodeJS, and AS400 application to a modern ReactJS, NodeJS (utilizing NestJS and Prisma), and AS400 application stack. Responsibilities included backend development using NodeJS, implementation of lambda functions, and database design.

RCUH FIS – *DevOps, Developer*

Jake worked in DevOps engineering for RCUH by maintaining the system, upgrading EOL technologies, and enhancing certain aspects of the currently running Angular front end in quarterly sprints.

AlohaClear – Developer

Jake was a developer for AlohaClear, a platform used for COVID-19 testing in the state of Hawaii. The project technologies included a React/Angular front-end (Web/WebAdmin) and PostgreSQL backend which were all hosted and deployed through the AWS cloud.

TalofaPass – American Samoa – Thermal Cameras, BA

Jake Installed and tuned thermal camera systems to assist in slowing the spread of COVID-19 in American Samoa. Alongside installing the thermal cameras, he also collaborated with government officials to streamline operational processes and understand the technical requirements for the project.

TalofaPass – QA, Developer

Jake collaborated with DataHouse Asia to deliver software solutions, encompassing both development and quality assurance, for the TalofaPass team.

IPTS Perspecta – Tiny Ants – Developer

Jake contributed to DataHouse Asia's efforts in delivering software solutions for the IPTS custom development project. Responsibilities involved Angular development across four sprints.

Hawaii Department of Education (HIDOE) – Electronic Comprehensive Student Support System – Child Count Verification Application Refactor

Jake was a developer in the modernization of the Child Count Verification application while collaborating with eCSSS. Responsibilities encompassed front-end (Vue) and middleware (Express) development for the application.

Hawaii Department of Education (HIDOE) – Electronic Comprehensive Student Support System – PT/SPEECH Application

Jake participated in the initiation of the PT/SPEECH web applications in collaboration with eCSSS. Responsibilities included front-end (Vue) and middleware (Express) development for the application.

Hawaii Department of Education (HIDOE) Facilities – *DOE-facs, DOE-Refuse, Freshdesk*

Jake utilized an Agile scrum approach while working with DOE-facs, contributing to both new development and maintenance for the DOE-facs, DOE-Refuse, and Freshdesk applications. Involved in full-stack development and maintenance, utilizing PHP, RESTful API, and Caspio technologies.

RCUH – QA Analyst

Jake assisted RCUH in testing and reporting the functionality of deployed development, enabling the delivery of a high-quality product to the University of Hawaii (UH) through effective regression testing.

LumiSight – Application Support

Jake collaborated with LumiSight support agents to offer general user support for LumiSight applications.

DataHouse Consulting, Inc., Summer Intern, July 2020 – Aug 2020

NEC Corporation – NEC-HI DOT Airport Thermal Scanning

Jake partnered with NEC Corporation to deliver technical support, system maintenance, and the installation of thermal systems across State of Hawaii airports, to contribute to efforts to mitigate the impact of COVID-19.

LumiSight – Mobile and Web Applications QA Analyst

Jake collaborated with DataHouse 2020 Summer Interns on regression testing for LumiSight mobile and web applications, while also contributing to location mapping for planning operations.

DataHouse Consulting, Inc., Community Innovation and Mentorship Program Intern – Jan 2020 – May 2020

State of Hawaii Department of Agriculture – Animal Quarantine Airport Holding Facility – Queuing and Check-in System

Jake collaborated with DataHouse CIMP mentors and interns to create an efficient workflow solution for the Animal Quarantine Holding Facility. Focused primarily on front-end

development and additionally took charge of planning and installing hardware components for the system.

Technical Expertise

- Languages: JavaScript, TypeScript, C, C++, C#, MySQL, PostgreSQL, SQL, Python, HTML, CSS
- Frameworks: NestJS, Prisma, Angular, React, Vue, Express, .NET
- Platforms: AWS, Azure
- Analytical Tools: DynaTrace, CloudWatch
- Operating Systems: MacOS, Windows, Linux, Android, iOS
- IDE: Visual Studio Code, VS Enterprise, IIS, IntelliJ IDEA
- Version Control: Git CLI, GitHub Desktop
- Others: ML, AI, Data Analytics

Certifications

AWS Certified Cloud Practitioner

Issued Aug 2023 • Expires Sep 2026

AWS Certified Solutions Architect – Associate

Issued Sep 2023 • Expires Sep 2026

Education

B.S. Computer Engineering – University of Hawaii at Manoa – Fall 2020
